

Waste Separation

"Waste separation means that different types of garbage are collected and recycled separately."

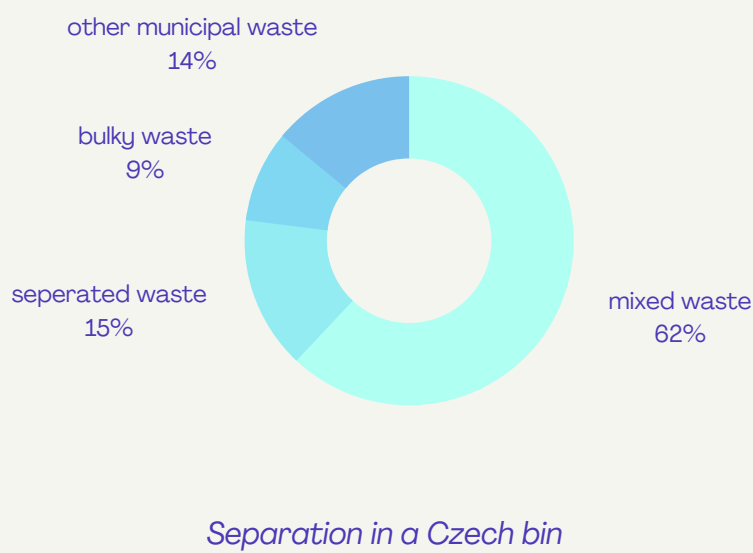

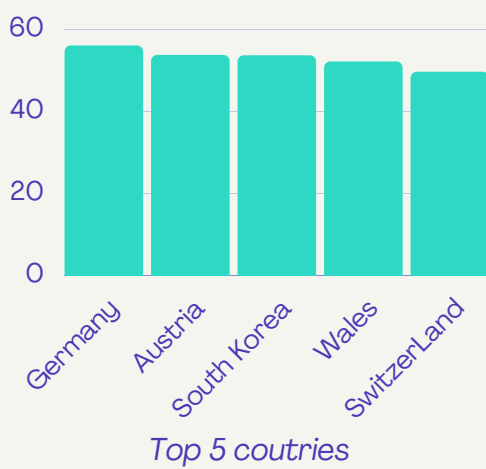

<https://handbookgermany.de/en/live/waste-separation.html>

There are multiple different waste separation systems around the world.

WASTE SEPARATION NOW

How different countries take care of waste separation:

GERMANY

Most efficient at waste separation

SLOVENIA

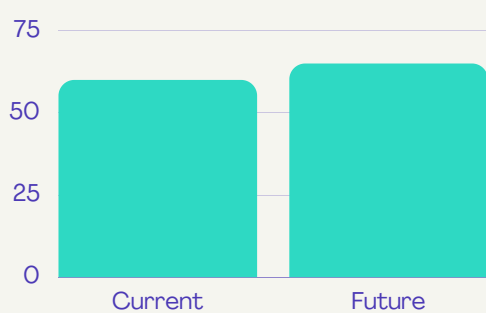

Waste separation not mandatory but recommended

ESTONIA

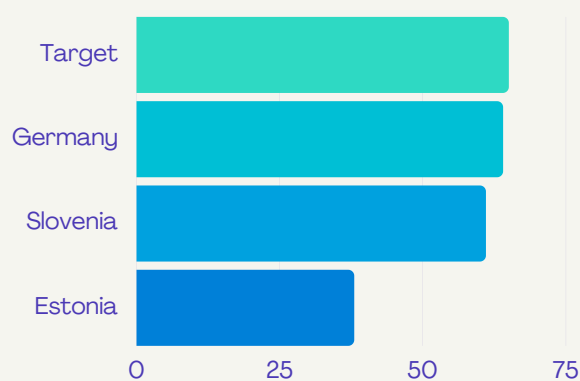

Purchase communal service for waste pick-up

WASTE SEPARATION IN THE FUTURE OF EUROPE

target for waste separation in the EU

Countries in relation to the target
